To Whom It May Concern

RE: Williams Brown Inc.

To whom it may concern:

I am the President of The Surgery Group. We recently built a new commercial building at 4012 North 9th Avenue. Williams Brown was our general contractor. We worked with Chad and Jeremy beginning in the design phase of the project and almost immediately selected their company as the ones we wanted to work with. That turned out to be a good decision, and it has been a pleasure to work with Williams Brown throughout the design and construction of our building. The end result has been an excellent construction job. It is a very functional building, and all processes are working properly. All through the construction process Williams Brown was receptive to our calls and always on the job promptly. The building's completion date was before the planned date, and we would not hesitate to use this company again for any of our construction needs. Chad and Jeremy seem to be very honest, trustworthy individuals and that certainly has been my experience through this process. They are experienced with commercial building and helped not only with the building but with the design phase. I would be happy to speak to anyone about my experience with this company, and they can contact me at the telephone on the letterhead.

Sincerely,

Robert F. Rubey, M.D., F.A.C.S.
