Re: Escambia County School District Safety Repairs

Chad:

We are pleased to commend Williams-Brown Inc. for its work on the Escambia County School District Safety Repairs. This project involving both large and small projects at twenty four different sites was not an easy project to manage. However, Williams Brown did an excellent job of completing all of the work on time and with a minimum of problems.

It is not often that such a complicated job runs this smoothly. Its success was due mostly to your firm's organization and consistent communication with your work forces, the school district staff and with our firm.

Thank you for a job well done. We would count ourselves fortunate to work with you again and to recommend your firm to other owners.

Sincerely,

Mike Marshall
