To whom it may concern,

Williams and Brown General Contractors have built two buildings for Ministry Village at Olive, Inc. Chad Williams and Jeremy Brown have done an outstanding job on both of our projects. Their team has a spirit of cooperation and maintains the high standards that Chad and Jeremy have established for their company.

The first project was the Health and Hope Medical Clinic located at 1718 E. Olive Road. This clinic was built in 2013 and is a 5020sqft building with a reception area, medical exam rooms, pharmacy, dental rooms and office space. This was approximately a \$560,000.00 project. It was completed on time and on budget.

In 2017 we contracted with them to build a 9438sqft early learning center on our campus. It should be completed by September 2018. After the Board of Directors decided to build, we did not put the project out for bid. Based on the quality of the product, the team spirit between our management team and their team and most importantly the established trust, we only wanted to work with Williams and Brown. I look forward to a third building project with this team of professionals.

Regards,

Stan C. Lollar III · Executive Director
